

LANGHANSINNOTECH

A close-up, shallow depth-of-field photograph of a row of precision-machined metal parts. The parts are cylindrical with various diameters and features, including a large circular hole in the foreground. They are arranged in a line on a dark, textured surface, possibly a conveyor belt or a worktable. The lighting is dramatic, highlighting the metallic sheen and the intricate details of the machining.

POINT OUT 01

LANGHANS INNOTECH

Mawag Prexite 2

The machine can be overhauled according to customer requirements.

- Year of manufacture: 1995
- Control: Siemens SPS (S5)
- Special feature: Second cutting operation with fast adjustable CutStar™ cutting units

LANGHANS INNOTECH

Mawag Prexite 2nd table

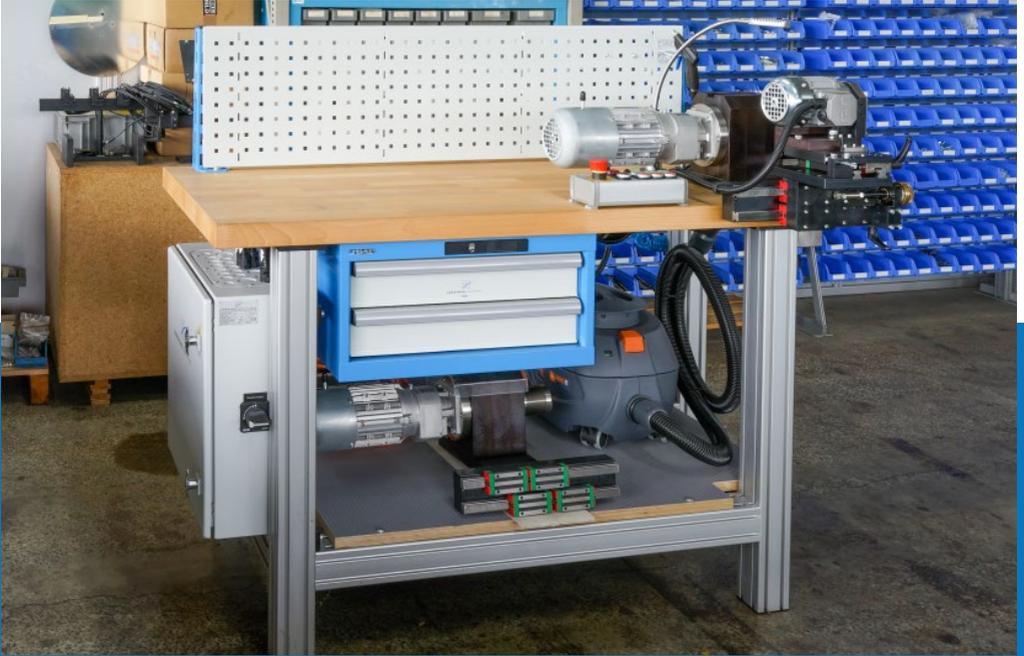

Ideal for retrofitting to turn an existing single slitter into a duplex slitter (not only for Mawag).

The machine can be overhauled according to customer requirements.

- Year of manufacture: 1992

LANGHANS INNOTECH

Offline Grinding

Sapin (Saudi Arabia) saves the purchase of different grinding devices for the slitters from different manufacturers and grinds all knives centrally on the grinding table. In addition to optimum hygiene and increased line efficiency, cost savings are an additional benefit of the grinding table.

LANGHANSINNOTECH

QMC-litho for Crown and KBA

While Crown in Concarneau Cedex / France is already using the QMC-Litho for quality control on its state-of-the-art coating lines, integration at KBA is currently undergoing intensive testing, with the prospect of integration in latest coater generations.

LANGHANS INNOTECH

Thank you!

Last year / 2021 was not only our 25th anniversary but also our most successful business year by far. Although we are a small company, we are continuously developing all areas of our business with great pleasure and are far from being at the end.

With this in mind; Full Steam Ahead!

* Impression from the other area in which we are passionately active – the overhaul of steam engines.
